Related Projects

Citation Style Language

An open source project for creating standard citation formats based on “CiteProc.” Biblio uses this to format citations in any citation style.

<http://www.citationstyles.org>

Style list here: <http://www.zotero.org/styles>

Digital Object Identifier (DOI)

that creates persistent links to scholarly online content and their metadata. Now used ubiquitously by academic journals and online books. Biblio can use this identifier to retrieve publication metadata.

<http://www.doi.org/>

Zotero

Another application using Citation Style Language. It allows scholars to catalog and cite works directly in a Firefox browser.

<http://www.zotero.org/>

BibTeX

The standard software and markup language for reference management, used by the popular LaTeX document formatter. The format is widely supported, including by Biblio, which can import BibTeX directly.
